Name: David Surname: Kambay-Bumba

Student Number: ST10530512

Chosen Proposal: Organisation 2

Module: HMAW WEDE5020W

Why I chose oragnisation 2

I chose to create a website for DMD Beauty Salon because it is a small business that offers a variety of beauty and hair care services, but customers may not always have an easy way to find information about the salon online. A website can provide customers with clear information about the services offered, such as braids, wigs, lashes, makeup and nails.

The website will also help DMD Beauty Salon create a professional online presence and make it easier for new and existing customers to discover the business. Customers will be able to view the different services, see pictures of previous work, find contact information and learn more about the salon before visiting.

I also chose this organisation because a website could help the salon attract a wider range of customers, including both men and women of different ages. Overall, the website will improve communication between the salon and its customers while helping the business promote its services and grow. (open Ai)
